# Mini Project – Phase-wise Submission Guidelines

The following deliverables are to be submitted at each stage of the Mini Project. Students are expected to maintain consistency between the proposed design, implementation, and final project.

## Mini Project Phase 1–2 — Project Proposal & System Design

### 1. Project Proposal

The proposal must include the following:

- **Project Title**
- **Problem Statement**
- **Motivation**
- **Objectives**
- **Scope of the Project**
- **Proposed Solution / Methodology**
- **Brief Literature Review / Related Work**
- **Expected Outcomes**

### 2. System Design

The system design must include, wherever applicable:

- **System Architecture / Block Diagram**
- **Flowchart / Process Flow**
- **Module Description**
- **Technology Stack**
- **Dataset Description**
- **Database / ER Diagram**
- Other relevant design diagrams, if required

### 3. Project Plan

The project plan must include:

- **Work Distribution among Team Members**
- **Project Timeline and Milestones**
- **Roles and Responsibilities of Team Members**

### Submission Requirements

**Submit: Project Proposal & System Design Document (PDF)**

---

## Mini Project Phase 3–4 — Implementation & Testing

At this stage, students are expected to demonstrate substantial progress toward the development of the proposed project.

### 1. Working Prototype

Students must submit/demonstrate:

- Implemented **features and modules**
- Working prototype of the proposed system
- **Screenshots** demonstrating the implemented functionality
- Short demonstration/video, if required

### 2. Source Code & Repository

Students must provide:

- **GitHub Repository Link**
- Complete source code developed up to this phase
- Properly structured **README file**
- Installation and execution instructions
- **Requirements / Dependencies**
- Relevant configuration files, where applicable

### 3. Testing & Results

The submission must include:

- **Test Cases**
- Testing Methodology
- **Testing Results**
- Performance Evaluation / Metrics, where applicable
- Graphs, Tables, or Visualizations, where applicable
- Identified Bugs / Issues
- Corrective Actions and Solutions Implemented

### 4. Progress Report

The progress report must include:

- Implementation progress against the **Phase 1–2 proposal and design**
- Completed and pending modules/features
- Deviations or changes from the original proposal, if any
- **Individual Contribution of Each Team Member**

### Submission Requirements

**Submit: Working Prototype + GitHub Repository Link + Testing & Progress Report**

---

## Mini Project Phase 5 — Final Evaluation

Phase 5 will constitute the **Final Evaluation** of the Mini Project. Students must submit and demonstrate the complete project.

### 1. Final Project

Students must present a:

- **Complete and Functional Application / System / Model**
- All major proposed features and modules should be implemented and operational.

### 2. Final Project Report — Physical Copy

The final report must contain the following sections:

1. **Introduction**
2. **Problem Statement**
3. **Objectives**
4. **Literature Review / Related Work**
5. **Proposed Methodology**
6. **System Design**
7. **Implementation**
8. **Testing**
9. **Results & Discussion**
10. **Conclusion**
11. **Limitations**
12. **Future Scope**
13. **References**

### 3. Final GitHub Repository

The final repository must contain:

- **Complete Source Code**
- Properly structured **README**
- Installation and Execution Instructions
- Requirements / Dependencies
- Dataset and/or Model Files, wherever applicable
- Relevant documentation and supporting files

### 4. Live Demonstration & Viva Voce

Each team will be required to participate in a **Live Project Demonstration and Viva Voce** covering:

- **Working Demonstration of the Project**
- Technical Implementation and Methodology

- Results and Performance
- Individual Technical Understanding
- **Individual Contribution of Each Team Member**
- Questions related to the project, source code, design, and implementation

**Final Submission**

**Final Project + Physical Report + Final GitHub Repository + PPT Presentation + Live Demonstration + Viva Voce**

---

**Important Instructions**

- All team members must have a **clear and demonstrable contribution** to the project.
- The implementation should be consistent with the proposal and system design submitted in **Phase 1–2**.
- Any significant changes in the project scope, methodology, or technology must be appropriately documented.
- Students are expected to maintain their **GitHub repository throughout the project development**, rather than uploading the complete code only at the final stage.
- All submitted work must be **original and properly referenced**.
